

Assignment: HTML, CSS, Bootstrap, JS

3rd sem (Bsc. CSIT)

Deadline: 2078/03/4 (2021 Jun 18 Friday)

Project Type: Individual

Project No.: 1

Provided By: Manoj Phuyal

Requirements of the Project

1. Built complete web page with html, CSS, Bootstrap, JavaScript.
 - Project must contain more than four menus with its navigations
 - Must contain footer and its content
 - Must contain body of content of each navigation
2. Code must write by explaining its types
 - CSS: Internal, Inline, External CSS
 - JS: Internal, External JS
 - Multipage: Multipage CSS, Multipage Html, Multipage JS
3. Use Bootstrap must require:
 - Grid System eg. div with and col divisions
 - Bootstrap: div, nav, footer, header, button, img, carousel, modal, collapse div etc.
 - Bootstrap table
 - Bootstrap form with fieldset, legend, label, input, textarea, dropdown, radio, checkbox, datepicker, timepicker
4. Use JavaScript or jQuery or Ajax for:
 - Page loader
 - jQuery form validation for min, max, number, email, fullname, required fields with proper message
 - Include two-way data binding with jQuery e.g. post value from form and displaying to the page after button click

Note: Each topic listed above is mandatory to your project. Beside these you can use your own logic on designing and implementation to use html, CSS, bootstrap, and JavaScript.
